

Four51 Certified Site Administrator

Required Prerequisites: *Four51 Admin Fundamentals or the completed proficiency exam.*

Suggested Prerequisites: *Basic knowledge of html, cascading stylesheets and website creation.*

Who should attend:

The Four51 Certified Site Administrator course is the perfect complement to Four51 Admin Fundamentals. Anyone who spends a lot of time designing and administering customer sites and needs to know the most advanced site configurations is a great candidate for this course and accompanying status of Four51 Certified Site Administrator.

What you will learn:

This two-day session builds directly on the Four51 Admin Fundamentals course. The course will teach you to create custom themes for your buyer companies' sites, as well as cover additional site customization options and advanced product configurations.

To complete this course and gain certification, you will need to pass a final test demonstrating the skills you have learned.

Why it's valuable to your company:

Becoming a Four51 Certified Site Administrator not only shows your customers that you have been thoroughly trained, it also equips you with the knowledge to provide advanced solutions to their requests and problems. You can satisfy more existing and prospective customers with your mastery of the application.

Where training is conducted:

Training and certification courses are held at least monthly at Four51 headquarters in Minneapolis, MN. If you have a group of five or more trainees, please contact Four51 for information about group rates and on-site training.

How to sign-up and learn more:

Visit the Training and Certification section of Access Four51 (<http://myaccess.four51.com>) to access course overviews, answers to frequently asked questions and a registration calendar. A proficiency exam may be administered for users who have previously taken Custom Theme Training.
