

Training Empowers Four51 Users

Training and certification from Four51 does more than just teach you to use the platform better—it empowers you to become a Four51 super-user. Not only can you work better and faster as you design custom, satisfying solutions for customers, but you can become and even more of an asset to your company.

Beth Jones, Huffman Systems

Beth received Pageflex training in 2007 and took Four51 Admin Fundamentals in 2008.

“I was showing coworkers how easy template building was and their mouths dropped when I told them, ‘Yes, it’s that easy.’ I appreciate the system a lot more now that I’ve had training—I thought it was so limited before I got trained because I wasn’t a part of it...now I realize all that I can do!”

Jan Calman, AGS Systems

Jan received the dual status of Four51 Certified Designer and Four51 Certified Site Administrator in 2008.

“You cannot be efficient and effective without training. You must be trained to make the most of the application and your investment. I would never trust anyone without training to do anything for me on the application.”

Julie Hruby, Palmer Printing

Julie received the dual status of Four51 Certified Designer and Four51 Certified Site Administrator in 2008.

“Doing the whole track was really helpful; I learned all the basics *and* all the specifics. You really leave feeling like, ‘I can do this!’

Shannon Jones, AS Hospitality

Shannon received Four51 Admin Fundamentals training and the Four51 Certified Site Administrator status in 2008.

“Even though I’ve been working on Four51 for almost two years, I thought I might be able to get a little something out of the Fundamentals training with Mike. Well, I was really wrong because I picked up *many* things that I didn’t know about or didn’t even know existed! For me, the training was extremely beneficial! I recommend both of these classes to anyone who wants a little more out of Four51 or for those new people who are just getting started.”
